

# PRE-SURGICAL CLEANSING

with OCuSOFT® Lid Scrub™ PLUS

In a recent study<sup>1</sup>, daily eyelid cleansing using OCuSOFT® Lid Scrub™ PLUS one week **pre-op** and in conjunction with topical Betadine **intra-op** demonstrated a significant reduction in Staph epidermidis, the leading cause of post-operative infections. The study also reported NO bacteria growth with the combination of OCuSOFT® Lid Scrub™ PLUS and topical Betadine **post-op**.

OCuSOFT® Lid Scrub™ PLUS in conjunction with topical Betadine may provide a less expensive alternative to pre-op topical anti-biotics as a value-added benefit in endophthalmitis prophylaxis compared to topical Betadine alone.

For more information, call **800-233-5469** or visit **www.ocusoft.com**.
